EDUCATION

BACHELOR OF SCIENCE
(B.SC.) / PLANT BIOLOGY &
BIOTECHNOLOGY
University of Benin, Benin City, NG

CERTIFICATIONS

- COMPUTER PROFESSIONALS REGISTRATION COUNCIL OF NIGERIA (CPN)
- ALX SOFTWARE ENGINEERING

SKILLS

- Cloud: AWS, Azure
- CI/CD: GitHub Actions, Azure DevOps
- IAC: Terraform, Ansible, YAML
- Containers: Docker, Kubernetes
- Systems: Linux, Windows, Nginx
- Scripting: Python, Bash, PowerShell
- Networking: DNS, SSL/TLS, VPNs, firewalls, reverse proxies, load balancers
- Observability: Logging, monitoring, alerting, incident response, root-cause analysis
- Microservices architecture
- Database development with SQL Server, Oracle, and MySQL
- Version Control: Git, GitHub, Azure Repos
- Team leadership and management

PROFESSIONAL PROFILE

DevOps and Cloud Infrastructure Engineer with 4 years of experience building and supporting secure, highly available systems. Skilled in CI/CD, Terraform, Docker, Kubernetes, Linux, cloud infrastructure, scripting, observability, incident response, and security hardening. Proven ability to automate operations, optimize deployments, enhance system reliability, and strengthen the resilience of business-critical production environments.

WORK EXPERIENCE

IT OFFICER - DEVOPS & CORE BANKING OPERATIONS LOTUS BANK / Lagos Nigeria / Feb 2025 – DATE

LOTUS Bank is a Nigerian non-interest bank committed to ethical financial services. As a DevOps and Core Banking Application Support professional, I support business-critical systems through CI/CD automation, cloud infrastructure, containerization, monitoring, and release engineering, improving availability, security, deployment efficiency, and operational resilience.

- Production Operations & Release Engineering** - Deploy, configure, and support business-critical applications across test and production environments. Coordinate releases, deployment validation, health checks, and production-readiness activities.
- DevOps, Cloud & Automation** - Manage Git workflows across GitHub, GitLab, and Azure DevOps. Build and maintain CI/CD pipelines, provision AWS infrastructure with Terraform, manage Docker and Kubernetes workloads on Linux, and automate operations using Bash, Python, and PowerShell.
- Observability, Reliability & Security** - Monitor applications, infrastructure, and transaction workflows using observability and log-analysis tools. Lead incident troubleshooting, root-cause analysis, security hardening, access control, and deployment governance.
- Cross-Functional Delivery** - Collaborate with developers, QA, infrastructure teams, vendors, and stakeholders to deliver releases, manage changes, resolve production issues, and drive continuous improvement.

ACHIEVEMENTS:

Transformed manual core banking deployments into an automated CI/CD process, accelerating releases while improving reliability and reducing operational risk.

SOFTWARE DEVELOPER & DEVOPS TECH BRIDGE/ Jul 2024 – Jan 2025

Tech Bridge is a technology company delivering modern software solutions. As a Software Developer and DevOps professional, I implemented CI/CD pipelines, containerized applications, automated deployments, and managed infrastructure to improve scalability, reliability, and delivery efficiency.

- Software Development & Delivery** - Built and deployed web applications using Git-based workflows, collaborative code reviews, and modern development practices.
- CI/CD & Release Automation** - Designed automated deployment pipelines, reducing manual release steps and improving consistency across development and staging environments.
- Containerization & Operations** - Containerized applications with Docker, managed Linux environments, configured load balancing for reliable traffic distribution, and automated operational tasks using Python and Bash.
- Agile Collaboration** - Collaborated in Agile sprints, code reviews, and retrospectives to deliver application features and infrastructure improvements on schedule.

ACHIEVEMENTS:

Built the company's DevOps ecosystem end to end, replacing manual deployments with CI/CD automation, Docker, Linux infrastructure, and load balancing.
